# Lab

▼ Create project with composer

```
composer create-project laravel/laravel laravel-bookstore
```

▼ To create a migration only

```
php artisan make:migration create_employee_table —create=employees
```

▼ To create a model only

```
php artisan make:model ModelName
```

▼ To create database table with migration

```
php artisan migrate:fresh
```

▼ To create a model with controller, factory, resource controller and migration

```
php artisan make:model Book -crfm
```

▼ To delete all the existing table schema and data, then create new table schema with migration. This will lost all the data.

```
php artisan migrate:fresh
```

▼ Seed fake data

```
php artisan db:seed
```

▼

▼ php artisan | grep 'make'

see the available make command

▼ php artisan make:model -h

see the help
